Future Oriented Coping And Job Hunting Among College Students

Future-Oriented Coping and Job Hunting Among College Students Yueqin Hu and Yiqun Gan Peking University Using a sample of Chinese college students (n = 216), the present study showed that future-oriented coping negatively correlated with perceived pressure and positively correlated with successful job hunting.

Future-Oriented Coping and Job Hunting Among College Students
Abstract: Using a sample of Chinese college students (n = 216), the present study showed that future-oriented coping negatively correlated with perceived pressure and positively correlated with successful job hunting. The relationship between proactive coping and preventive coping was also explored. Structural equation modeling suggested that a sequence model was better than a parallel model; that is, proactive coping mediated the effect of preventive coping on perceived pressure and ...

Future-Oriented Thinking, Proactive Coping, and the Management of Potential Threats to Health and Well-Being
Contributions to this special issue examine multiple aspects of how people think about and prepare for desired and undesired future outcomes, including the processes that link thoughts about one's present situation to possible future outcomes and those that promote the balanced pursuit of long-term vs. short-term goals. They also identify new distinctions among widely studied future-oriented ...

The Psychology of Future-Oriented Thinking: From Theory to Practice
To begin coping with stress at work, identify your stress triggers. For a week or two, record the situations, events and people who cause you to have a negative physical, mental or emotional response. Include a brief description of each situation, answering questions such as:

Coping with stress: Workplace tips - Mayo Clinic
Future orientation may not only motivate future-oriented behaviors, such as pursuing academic achievements and future goals, but also influence the decision making process about whether to engage in problem behaviors. If youth do not have positive expectations for the future and do not see current behaviors as linked to future goals they may not be concerned with the consequences of risk taking behaviors such as consuming substances, criminal involvement and violent behaviors.

Future orientation - Wikipedia
Traditional four-year and graduate programs will better prepare people for jobs in the future, as such an education gives people a general understanding and knowledge about their field, and here people learn how to approach new things, ask questions and find answers, deal with new situations, etc. - all this is needed to adjust to ongoing changes in work life.

Experts on the Future of Work, Jobs Training and Skills ...
People with positive coping skills are described as using "more mature, flexible, purposive, future-oriented, reality-based, and metered approaches to combating stressful and anxiety-provoking situations, whereas those with negative coping skills are viewed as rigid, past-propelled, reality-distorting, and lack real time adaptive processes" (Liveneh et al., 1996, p. 503).

Task-Oriented Coping - an overview | ScienceDirect Topics
Future-oriented coping, interpersonal coping, and religious and spiritual coping are introduced into the stress and coping model. The scope of coping has been broadened to include the regulation of positive as well as negative emotion states.

Stress, Health, and Coping: Synthesis, Commentary, and Recommendations
Individuals also engage in proactive coping. These future- and action-oriented behaviors can prepare a person not only for specific stressors, but also for those that are likely to arise in the normal course of life.

Coping Strategies - an overview | ScienceDirect Topics
For instance, distraction-oriented coping (a form of emotion-focused coping) does not correlate with either better performance or affective state, whereas a combination of distraction-oriented coping with task-oriented (i.e., problem-focused) coping leads to more positive outcomes (Gaudreau and Blondin 2004).

Does Distraction Facilitate Problem-focused Coping with Stress?
We also review two alternative coping taxonomies: Edwards and Baglioni's (1993, 2000) cybernetic coping and Skinner, Edge, Altman, and Sherwood's (2003) hierarchical classification of coping according to adaptive function. Finally, we discuss recent refinements to the transactional theory, most notably, future-oriented coping.
